

Experience maximum return on investment with our trademark multi-Display Signage systems with support for up to 11 displays with same or different content - up to 600' away!

Digital Signage

NTI delivers the **ONLY** professional grade, Digital Signage Servers (DS-Z Series) which utilize the latest video technology available on the market today.

What is Digital Signage?

Digital signage is a form of advertising in which content and messages displayed on an LCD or TV known as a Digital Sign, typically with the goal of delivering targeted messages to consumers. Digital signage offers superior return on investment (ROI) over traditional advertising media. The content displayed on digital signage screens can range from simple text and still images to full-motion video, with or without audio using digital signage software. Content can be made to signs up to **600'** away!

DS-Z Series Digital Signage Systems

Our easy to use systems allow you to make changes quickly and cost effectively. Targeted messages can be distributed to the DS-Z displays from the "Control Center" server. With the unique **multiple monitor** digital signage server, you can easily create and publish direct digital marketing campaigns to your customers, presenting a clear "call-to-action message" on your digital marketing campaign. Our systems support up to 11 displays from a single PC based systems with all the software you need to add digital signage to your business.

Digital signage has many uses for your business. For example; a restaurant could display menus, advertisements, specials and other information which can be updated from the back office. Our systems are very versatile therefore good for any type of business or environment.
