

2 to 12 independent displays from a single computer workstation. Move your mouse across ALL displays for total control over your working environment.

QuadStation Systems

Multi Display Control Room Workstations

About QuadStations

QuadStations are high speed, multiple screen computer systems designed for Control Rooms.

The systems support from **2 to 12** independent displays and your mouse moves easily across all screens allowing you to monitor many areas from a single location.

Control Rooms & Surveillance Monitoring

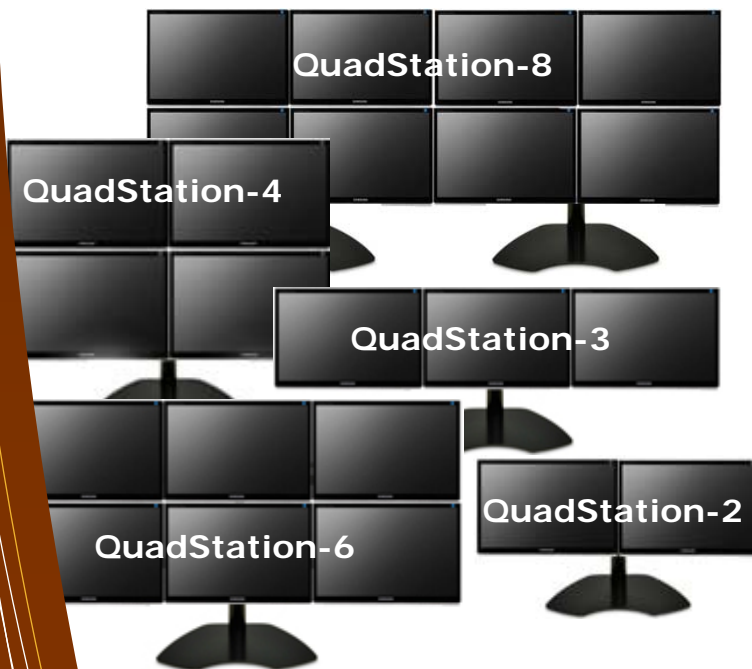

To create a more effective control room, you must have the right equipment. Control rooms, surveillance companies, law enforcement and municipalities will experience immediate productivity gains by implementing **QuadStation** systems into their control room environments.

Shipped Ready for Work

Setup is fast and systems are ready for work right out of the box. Full technical support is available if needed, and includes a 3 year warranty.

Versatile LCD Mounting Arrays

We also offer a very wide variety of expandable **LCD monitor mounts** with many mounting configurations to choose from. See our website for full details.

Perfect For:

- Any Control Room
- Surveillance Monitoring
- Manufacturing Plants
- Law Enforcement
- Military
- Municipal

Featuring the worlds fastest
Intel **i7 Processors!**

Not Just an Ordinary Computer

There is nothing "ordinary" about our systems. QuadStations are designed specifically to maximize performance on every level and powered by Intel's fastest **i7 Series processors**.

Nothing is ever sacrificed in a QuadStation as we continue to engineer the most powerful and reliable multi display computer systems on the planet.

FRD Drive = Built in Redundancy

Every QuadStation comes standard with TWO hard drives. The main System drive, and a matching second drive called an **FRD drive** (*Factory Restore Drive*).

The **FRD** drive is a completely bootable secondary hard drive that is installed in your QuadStation. In the event of any type of application, operating system or hard drive issue the FRD has you covered. Simply change the 2 cables from the main drive to the FRD drive and your system will be restored back to 'factory state' in literally minutes, up and running!

Shipping is Always Free

Purchase any QuadStation system and we will cover the shipping anywhere in the continental US. Blind drop shipping is also available.

Rackmount Chassis (Optional)

If you require a rack mount chassis for your server cabinet, just let your sale rep know.
