

FOR IMMEDIATE RELEASE

QuadStation Professional Workstations are increasing productivity worldwide

Naples, Florida - January 1, 2009 – Naples Technology, Inc. (NTI) the manufacturer of the QuadStation multi-monitor workstations is pleased to announce their newest workstation line. The **QuadStation Professional Series** also known as the **QS2-Pro** and **QS3-Pro** respectively referring to the number of monitors that can be connected to a single computer. This unique workstation exponentially increases productivity allowing the user to manage large amounts data simultaneously, giving the term 'multitasking' a whole new meaning.

The advantages of multi-display workstations are far reaching. In many professions, including graphic design, financial, architectural, engineering and video editing, the use of two or more displays has always been essential. This cutting edge technology is now extending to the professional office making the single display computer a thing of the past.

Business professionals can substantially enhance productivity by 50% or more by implementing multi-display workstations into their offices. By increasing the amount of visual workspace available, attorneys, accountants, researchers, financial consultants, hospital staff, and more can accomplish more in the same amount of time.

NTI has developed the multi-display **QuadStation Professional** workstation, based on the newest advances in technology and designed to increase the efficiency of business professionals in all industries. In today's world of information overload, it is now more important than ever to be able to process the massive amount of data that is the backbone of any business, and NTI provides that solution.

When more information can be processed simultaneously, it eliminates the need to minimize and maximize applications over and over again throughout the work day wasting precious time. The user can open multiple applications at once and the mouse moves across all displays creating an extremely productive and efficient work environment in any business.

QuadStations are revolutionizing the business world and becoming standard equipment in offices worldwide. These systems also help businesses move one step closer to the 'paperless office' of the future and the return on investment (ROI) is immediate.

NTI is a privately held Florida Corporation originally established in 1995 as a consulting firm, and has grown to become the leader in multi display workstation products with a strong worldwide presence. They have extensive experience in this technology, with the goal of helping businesses become more productive and efficient.

NTI is leading the way to the next generation of business technology and changing the way the businesses think about the traditional office workspace.
