

# QuadStation Workstations

*Multiple Display Trading Computers*

**QuadStations** are high performance, multiple monitor computer systems designed for traders who are serious about their trading equipment.

The systems provide support for **2-12** independent displays driven by a single workstation and the mouse moves across all screens.

All QuadStations come standard with powerful Intel i7 Series CPUs, the world's fastest processors available to date.

QuadStation systems are guaranteed and ready for work right out of the box.

*Worlds Fastest Processors!*

### Key Features:

## Maximum Uptime

In addition to the primary drive, all QuadStation systems come with a unique 2nd drive called a **FRD** (Factory Restore Drive).

This is a bootable hard drive installed in the system in the event of a hard drive or software issue. The FRD drive will restore your QuadStation back to factory state in just minutes so you can get back to trading. Just download your trading platform and you are ready to go!

## Quality Without Compromise

Quality is never sacrificed on any level in a QuadStation, in our continued effort to build the best performing and longest lasting trading workstations in the world.

QuadStations are backed by a solid **3yr** hardware warranty in addition to **FREE** Remote Technical Support via our web based support portal.

## LCD Monitor Mounts

If you are looking for a turnkey solution we also offer LCD monitors and mounts for a complete trading system ready for work out of the box. Mount from 2 to 12 monitors in a variety of arrays.
