

3 independent displays running on a single computer workstation. Move your mouse across ALL displays with different applications open on each screen!

QS-3 Professional

NTI delivers the *most reliable*, professional grade, multi-display workstations available on the planet, utilizing only the latest Intel technology .

3 displays from
1 PC

TRIPLE
Productivity!

*Mouse moves across
all displays!*

The **QS-3 Professional** workstation is our multi monitor system specifically designed for business professionals. Expand from a single monitor to a very productive multi display working environment in your office with 3 independent displays. Drag your mouse between monitors and open several applications at once! Everything you need is included.

Key Benefits:

- Multiply your productivity by up to **3** times
- Open separate applications on each display
- Stop minimizing and maximizing windows
- Increase efficiency and profit
- Featuring the fastest processors by Intel
- Fast turnaround time, quick delivery
- Shipped ready for work out of the box
- Preconfigured, tested, and guaranteed
- Monitors and monitor mounts also available

"We were looking to increase productivity within our sales team. We expected some improvement in efficiency by adding NTI's QS-3 Systems but did not expect to double our profits this month!"
Thanks NTI"

The powerful **QS-3 Professional** workstation is designed specifically to create an extremely productive, multi display business workspace. No gaming, no fluff, just serious horsepower. Every component in the QuadStation system is the absolute highest quality available anywhere to ensure that your business is consistently productive.

Take the next step in making your business more efficient and profitable!

- Long news articles
- Faster researching online
- Produce **THREE** times the amount of work with a **QS-3 Pro**

Rotate Monitors
90 degrees with
included software

QS-3 Pro Mobile Workstation

NEW!

For the busy professional with more than 1 office

"Finally, my staff has become more efficient with their new mobile workstations, while here or in in their remote office. My staff works mostly from their home office, but I have installed extra monitors on desks at my office, should they need to come in for client meetings. They can now open multiple applications or documents which is extremely important for my accountants. No more minimizing and maximizing screens all day! I see the change in the attitudes and work flow. It is unbelievable at how much more productive they are!"

D. Abbot, CPA, P.A.

Upgrade your office computers to **QS-3 Professional** workstations or Mobile workstations. The small investment will come back to you 10 fold in increased productivity in your business!
