

Construction Site Video Surveillance

View and Record Live Jobsite Video From Anywhere !

Reduce Jobsite Material Theft

Jobsite material theft exceeds \$1 Billion a year adding 1-2% to the cost of construction. Installing a portable video surveillance system right on the jobsite provides around the clock monitoring of your construction projects day and night. When the job is finished, move it to the next site.

Real-time, live video is recorded to the computer hard drive. All video can be recorded at another location OFF site. Capture entire construction projects on video. Time and date stamped.

2 Ways to view and play back video:

Locally on the jobsite

OR

Remotely over the internet from another location!

View ALL jobs on one screen!

Easy to Use:

- Surveillance camera(s) installed on the job trailer.
- Cameras *record real time*, to the RVS Server computer hard drive.
- View live video and recordings on the jobsite.
- View live video and recordings remotely over your existing internet connection.

Portable:

- Watch over all of your jobsites from headquarters
- Cameras are installed on one or more jobsites.
- All cameras can be viewed from another location via internet.
- When project is finished, move System to next jobsite.
- **1 camera to 10 camera** systems available.
- Free local installation and setup in the Naples area.
- Control Pan, Tilt, & Zoom cameras remotely!

NO recurring fees!
